NEWS RELEASE

Westfall Company, Inc. Announces New Addition to Product Inventory

Eureka, MO—Westfall Company, Inc. of Eureka, MO has added Schedule 80 CPVC Pipe, fittings and valves to our inventory. Schedule 80 CPVC products come from Harvel Plastics, Inc. which is located in Easton, PA.

Westfall Company, Inc. has been serving our customers since 1972. We take pride in our high quality products and services, as well as our knowledge of industry-leading products. We are dedicated to continuing to educate ourselves in our product lines and in the industry we serve. Alan Westfall, President of Westfall Company, Inc. says “we are confident that this product will compliment our existing line of quality corrosion resistant products.”

Harvel Plastics, Inc. has been devoted to the quality of their products since 1964. Their comprehensive quality program has always been based on the continuous improvement tools of Total Quality Management and Statistical Process Control.

These piping systems can handle more than three-fourths of the temperature/pressure requirements of today’s typical process plants. As with all thermoplastic piping systems, CPVC’s ability to withstand pressure varies with pipe diameter, wall thickness, and temperature.

Westfall Company, Inc. is a major supplier of pipe, pumps, tanks, valves, fiberglass structures and emergency field repairs of non-metallic systems.
